Our Heritage from Atlantis vs. Modern Technology

People are currently wondering what happened to all of us? How did we go from a very simple, community-oriented society to the mess we are presently experiencing in the world around us? Why haven't we foreseen these predicaments?

Let's embark on a voyage through time to uncover some of the answers to a most important question. How did get from there to here?

In modern times we look for solutions to our problems by extracting them from overall reality and healing just that one, individualized aspect. Our ancestors from Atlantis looked at problems differently, wholistically – at improving their environment, so anything which can be possibly harmful for the society will be annulled or counteracted.

Some believe that most of the problems we are now facing are due to the fact that some Atlanteans incarnated in the 20th and 21st centuries and this is a bad thing.

Others claim the exact opposite and feel that the rapid advancement of technology in the second part of 20th century is wonderful and also due to those incarnated Atlantean souls.

Following the saying "you cannot get where you want to be if you do not know from where you came...", let's explore topics such as:

- **Why they didn't need 5G on Atlantis?**
- **A secret of the Atlantean symbology, that still works to this day helping people manage their energy and protect their homes.**
- **How can we switch our thinking to more beneficial for all of us, so we will heal our bodies and balance our environment?**

Join us for the class, where spirituality and science truly meet!
