## **The Secrets of Negative Green Vibration**

Negative Green Vibration - the most controversial vibration of all.  
Should we be afraid of it or rather cherish it.

I invite you for a journey, which will lead us through the meanders of that frequency. As we will discover, this type of energy, as in fact everything in our life, has two faces. One is the most horrifying for those not knowing how to utilize it in their life, and the other - most soothing, healing and powerful vibrations of all, very close in its power to the Vibration of Gold.

Why then so many discourses and misunderstandings?

Maybe because when it was discovered in the early 1930s in Egypt by two French scientists, they gave it this unfortunate name "Negative" Green? But it wasn't because it is "bad," but because they did not know how to call it, so they went by its geographical location on the circle! I do explain that in the course of my lecture.

The amazing effect of both of them, if you know how to use them, makes people very powerful. It is, in fact, a fantastic carrier wave, which is able to bring your deepest desires, goals and ideas up to the higher dimensions, so they hear you and can assist in the manifestation of them.

If you want to know secrets, if you genuinely want to understand the energy and, in part, how the universe communicates with us, this lecture will explain the physics and metaphysics of it.

Join me on the discovery of one of the most unique, powerful and mystical frequency of all!

Running time: 1h 22 minutes

NOTE: To learn more about practical applications and specific work protocols with Osiris and Karnak pendulum, we suggest continuing with a course ["Working with Negative Green Pendulums."](#)
